

## Greater Fox Cities Area Habitat for Humanity Excavation Bid Specs

This bid is for all Habitat's New Construction Projects for the entire year. The number of bedrooms is dependent on family size (See the included typical plan). Bedrooms for 3-5 bedroom homes will be placed in the basement area using egress windows. The number of new houses will usually be 13 – 15 projects built throughout the year. A schedule of work showing excavation, backfill and finish grading dates will be provided at the beginning of each build year for all projects. This allows the contractor to schedule Habitat work well in advance of the date needed.

A house plan for 329 Lisbon Street Menasha is included as a reference for the footprint of a typical Habitat house. Habitat to stake and set the grade on all properties. The excavator to provide any necessary permits required in addition to the normal building permit that Habitat provides.

Please provide the following in your bid submittal:

Tracking Pad \$  
Erosion Control per foot \$
