Chapter 18 – Installing Swinging Doors

 	
Door &	1. Check door/frame for damage. If damaged, notify Construction Supervisor or Site Leader
Opening Prep	2. Verify correct door type, size, and size according to the house plan. Set door next to intended location.
	3. Check Jack/King studs for excessive twist. If clearly out of square adjust with shims during installation.
Adjust <u>Hinge</u>	4. Mark location of hinges on hinge and strike side Jack studs.
Side Jack	5. In all cases, install 3x5" shims using 1½" finish nails or 1½" collated finish nails with 5" dimension vertical and
Stud	flush to the hinge pin side of the framing.
	6. Using 6' level, check if the hinge-side Jack stud is plumb. If NOT PLUMB, add shims to the top and bottom
	hinge areas until it is plumb.
	7. Measure the width of door frame at the head jamb and rough opening at top/bottom hinge locations
	a. If the differenced at either location is >5/8", nail a combination of 3"x5" and cardboard shims at top &
	bottom hinge locations until difference is <5/8" but greater than 3/8" at both locations.
	b. At either or both locations with a gap >3/8", add 1/8" shims to bring the gap to 3/8".
	8. Keeping the 6' level against the top and bottom spacers, attach 3"x5" shims and/or tapered shims at middle
	hinge location until flush with level
Adjust <u>Strike</u>	9. Add combination of 3"x5" and cardboard shims to strike side jack stud at top/bottom hinge locations until
Side Jack	difference in opening is <3/8" but >1/4"at both locations.
Stud	10. Place level against spacers and Install shims at middle hinge area until flush with level
Temporarily	11. Set door in rough opening, tight to hinge side Jack stud. If in carpet area (see House Plan), set door on 3/8"-
Secure Door	thick shim (1/8" and ¼" shims). Otherwise, set directly on hard finished flooring.
Secure Door	12. Using shims against the head jamb, temporarily wedge door against hinge side with horizontal pressure
	13. Check that head jamb left/right reveals are equal. Shim hinge or strike jamb up or down as needed.
	14. Recheck hinge side jamb is still plum
	15. Verify that bottom of hinge jamb is still centered between wall surfaces.
	a. Add spacers/shims at bottom of jamb and temporarily secure it with one 2½" collated nail above the
	spacers/shims.
	Space 3/3111113.
	h Do the same for the strike side jamh
	b. Do the same for the strike side jamb. 16. Recheck hinge side is still plumb, centered between wall surfaces
	16. Recheck hinge side is still plumb, centered between wall surfaces
Permanently	16. Recheck hinge side is still plumb, centered between wall surfaces17. Verify consistent door stop contact, adjust side jambs as needed
Permanently Secure Door	 16. Recheck hinge side is still plumb, centered between wall surfaces 17. Verify consistent door stop contact, adjust side jambs as needed 18. With door still tight to hinge side jamb, secure with one 2½" collated nail at each hinge location on non-hinge
Permanently Secure Door	 16. Recheck hinge side is still plumb, centered between wall surfaces 17. Verify consistent door stop contact, adjust side jambs as needed 18. With door still tight to hinge side jamb, secure with one 2½" collated nail at each hinge location on non-hinge side of doorstop and through shims.
-	 16. Recheck hinge side is still plumb, centered between wall surfaces 17. Verify consistent door stop contact, adjust side jambs as needed 18. With door still tight to hinge side jamb, secure with one 2½" collated nail at each hinge location on non-hinge side of doorstop and through shims. 19. Re-check plumb (on hinges) and jamb centered in wall. Adjust as required.
-	 Recheck hinge side is still plumb, centered between wall surfaces Verify consistent door stop contact, adjust side jambs as needed With door still tight to hinge side jamb, secure with one 2½" collated nail at each hinge location on non-hinge side of doorstop and through shims. Re-check plumb (on hinges) and jamb centered in wall. Adjust as required. Replace one short screw in top hinge with #8 3" brass screw. Adjust for equal head jamb reveals.
-	 Recheck hinge side is still plumb, centered between wall surfaces Verify consistent door stop contact, adjust side jambs as needed With door still tight to hinge side jamb, secure with one 2½" collated nail at each hinge location on non-hinge side of doorstop and through shims. Re-check plumb (on hinges) and jamb centered in wall. Adjust as required. Replace one short screw in top hinge with #8 3" brass screw. Adjust for equal head jamb reveals. Recheck door operation and head jamb reveal. Adjust strike side jamb up/down as needed
-	 Recheck hinge side is still plumb, centered between wall surfaces Verify consistent door stop contact, adjust side jambs as needed With door still tight to hinge side jamb, secure with one 2½" collated nail at each hinge location on non-hinge side of doorstop and through shims. Re-check plumb (on hinges) and jamb centered in wall. Adjust as required. Replace one short screw in top hinge with #8 3" brass screw. Adjust for equal head jamb reveals. Recheck door operation and head jamb reveal. Adjust strike side jamb up/down as needed Verify uniform contact with door stop, latch & strike alignment, jambs centered within wall (max 1/8")
-	 Recheck hinge side is still plumb, centered between wall surfaces Verify consistent door stop contact, adjust side jambs as needed With door still tight to hinge side jamb, secure with one 2½" collated nail at each hinge location on non-hinge side of doorstop and through shims. Re-check plumb (on hinges) and jamb centered in wall. Adjust as required. Replace one short screw in top hinge with #8 3" brass screw. Adjust for equal head jamb reveals. Recheck door operation and head jamb reveal. Adjust strike side jamb up/down as needed Verify uniform contact with door stop, latch & strike alignment, jambs centered within wall (max 1/8") past/shy of wall surface. Adjust as required.
-	 Recheck hinge side is still plumb, centered between wall surfaces Verify consistent door stop contact, adjust side jambs as needed With door still tight to hinge side jamb, secure with one 2½" collated nail at each hinge location on non-hinge side of doorstop and through shims. Re-check plumb (on hinges) and jamb centered in wall. Adjust as required. Replace one short screw in top hinge with #8 3" brass screw. Adjust for equal head jamb reveals. Recheck door operation and head jamb reveal. Adjust strike side jamb up/down as needed Verify uniform contact with door stop, latch & strike alignment, jambs centered within wall (max 1/8") past/shy of wall surface. Adjust as required. Check reveals at top and bottom of hinge jamb
-	 Recheck hinge side is still plumb, centered between wall surfaces Verify consistent door stop contact, adjust side jambs as needed With door still tight to hinge side jamb, secure with one 2½" collated nail at each hinge location on non-hinge side of doorstop and through shims. Shim and nail at the bottom of jamb until equals top reveal. Install and nail (non-hinge) side of doorstop) remaining shims: strike side top & bottom hinge locations; above the latch location. Install shims in center of head jamb, adjust for consistent reveal across jamb, and nail on one side of doorstop. Re-verify contact between door and doorstop at head jamb and strike jamb. Tap 2x4 scrap or spacer on jamb
-	 Recheck hinge side is still plumb, centered between wall surfaces Verify consistent door stop contact, adjust side jambs as needed With door still tight to hinge side jamb, secure with one 2½" collated nail at each hinge location on non-hinge side of doorstop and through shims. Re-check plumb (on hinges) and jamb centered in wall. Adjust as required. Replace one short screw in top hinge with #8 3" brass screw. Adjust for equal head jamb reveals. Recheck door operation and head jamb reveal. Adjust strike side jamb up/down as needed Verify uniform contact with door stop, latch & strike alignment, jambs centered within wall (max 1/8") past/shy of wall surface. Adjust as required. Check reveals at top and bottom of hinge jamb Adjust shims against the head jamb as required so top reveal equals reveal below top hinge. Secure with 2½" collated nails on one side of doorstop. Shim and nail bottom of hinge jamb until reveal equals reveal at top of bottom hinge. Check reveals at top and bottom of strike jamb (minimum 1/8"). Shim and nail at the bottom of jamb until equals top reveal. Install and nail (non-hinge) side of doorstop) remaining shims: strike side top & bottom hinge locations; above the latch location. Install shims in center of head jamb, adjust for consistent reveal across jamb, and nail on one side of doorstop. Re-verify contact between door and doorstop at head jamb and strike jamb. Tap 2x4 scrap or spacer on jamb (<1/8" from plaster) and/or doorstop to adjust. Last resort: remove/re-install doorstop.
-	 Recheck hinge side is still plumb, centered between wall surfaces Verify consistent door stop contact, adjust side jambs as needed With door still tight to hinge side jamb, secure with one 2½" collated nail at each hinge location on non-hinge side of doorstop and through shims. Re-check plumb (on hinges) and jamb centered in wall. Adjust as required. Replace one short screw in top hinge with #8 3" brass screw. Adjust for equal head jamb reveals. Recheck door operation and head jamb reveal. Adjust strike side jamb up/down as needed Verify uniform contact with door stop, latch & strike alignment, jambs centered within wall (max 1/8") past/shy of wall surface. Adjust as required. Check reveals at top and bottom of hinge jamb Adjust shims against the head jamb as required so top reveal equals reveal below top hinge. Secure with 2½" collated nails on one side of doorstop. Shim and nail bottom of hinge jamb until reveal equals reveal at top of bottom hinge. Check reveals at top and bottom of strike jamb (minimum 1/8"). Shim and nail at the bottom of jamb until equals top reveal. Install and nail (non-hinge) side of doorstop) remaining shims: strike side top & bottom hinge locations; above the latch location. Install shims in center of head jamb, adjust for consistent reveal across jamb, and nail on one side of doorstop. Re-verify contact between door and doorstop at head jamb and strike jamb. Tap 2x4 scrap or spacer on jamb (<1/8" from plaster) and/or doorstop to adjust. Last resort: remove/re-install doorstop. Install and nail additional shims between hinge locations, strike and hinge side (total 6 sets of shims each side).
-	 Recheck hinge side is still plumb, centered between wall surfaces Verify consistent door stop contact, adjust side jambs as needed With door still tight to hinge side jamb, secure with one 2½" collated nail at each hinge location on non-hinge side of doorstop and through shims. Re-check plumb (on hinges) and jamb centered in wall. Adjust as required. Replace one short screw in top hinge with #8 3" brass screw. Adjust for equal head jamb reveals. Recheck door operation and head jamb reveal. Adjust strike side jamb up/down as needed Verify uniform contact with door stop, latch & strike alignment, jambs centered within wall (max 1/8") past/shy of wall surface. Adjust as required. Check reveals at top and bottom of hinge jamb Adjust shims against the head jamb as required so top reveal equals reveal below top hinge. Secure with 2½" collated nails on one side of doorstop. Shim and nail bottom of hinge jamb until reveal equals reveal at top of bottom hinge. Check reveals at top and bottom of strike jamb (minimum 1/8"). Shim and nail at the bottom of jamb until equals top reveal. Install and nail (non-hinge) side of doorstop) remaining shims: strike side top & bottom hinge locations; above the latch location. Install shims in center of head jamb, adjust for consistent reveal across jamb, and nail on one side of doorstop. Re-verify contact between door and doorstop at head jamb and strike jamb. Tap 2x4 scrap or spacer on jamb (<1/8" from plaster) and/or doorstop to adjust. Last resort: remove/re-install doorstop. Install and nail additional shims between hinge locations, strike and hinge side (total 6 sets of shims each side). Adjust for uniform reveals.
-	 Recheck hinge side is still plumb, centered between wall surfaces Verify consistent door stop contact, adjust side jambs as needed With door still tight to hinge side jamb, secure with one 2½" collated nail at each hinge location on non-hinge side of doorstop and through shims. Re-check plumb (on hinges) and jamb centered in wall. Adjust as required. Replace one short screw in top hinge with #8 3" brass screw. Adjust for equal head jamb reveals. Recheck door operation and head jamb reveal. Adjust strike side jamb up/down as needed Verify uniform contact with door stop, latch & strike alignment, jambs centered within wall (max 1/8") past/shy of wall surface. Adjust as required. Check reveals at top and bottom of hinge jamb Adjust shims against the head jamb as required so top reveal equals reveal below top hinge. Secure with 2½" collated nails on one side of doorstop. Shim and nail bottom of hinge jamb until reveal equals reveal at top of bottom hinge. Check reveals at top and bottom of strike jamb (minimum 1/8"). Shim and nail at the bottom of jamb until equals top reveal. Install and nail (non-hinge) side of doorstop) remaining shims: strike side top & bottom hinge locations; above the latch location. Install shims in center of head jamb, adjust for consistent reveal across jamb, and nail on one side of doorstop. Re-verify contact between door and doorstop at head jamb and strike jamb. Tap 2x4 scrap or spacer on jamb (<1/8" from plaster) and/or doorstop to adjust. Last resort: remove/re-install doorstop. Install and nail additional shims between hinge locations, strike and hinge side (total 6 sets of shims each side). Adjust for uniform reveals. At all shim locations, nail at opposite side of doorstop.
-	 Recheck hinge side is still plumb, centered between wall surfaces Verify consistent door stop contact, adjust side jambs as needed With door still tight to hinge side jamb, secure with one 2½" collated nail at each hinge location on non-hinge side of doorstop and through shims. Re-check plumb (on hinges) and jamb centered in wall. Adjust as required. Replace one short screw in top hinge with #8 3" brass screw. Adjust for equal head jamb reveals. Recheck door operation and head jamb reveal. Adjust strike side jamb up/down as needed Verify uniform contact with door stop, latch & strike alignment, jambs centered within wall (max 1/8") past/shy of wall surface. Adjust as required. Check reveals at top and bottom of hinge jamb Adjust shims against the head jamb as required so top reveal equals reveal below top hinge. Secure with 2½" collated nails on one side of doorstop. Shim and nail bottom of hinge jamb until reveal equals reveal at top of bottom hinge. Check reveals at top and bottom of strike jamb (minimum 1/8"). Shim and nail at the bottom of jamb until equals top reveal. Install and nail (non-hinge) side of doorstop) remaining shims: strike side top & bottom hinge locations; above the latch location. Install shims in center of head jamb, adjust for consistent reveal across jamb, and nail on one side of doorstop. Re-verify contact between door and doorstop at head jamb and strike jamb. Tap 2x4 scrap or spacer on jamb (<1/8" from plaster) and/or doorstop to adjust. Last resort: remove/re-install doorstop. Install and nail additional shims between hinge locations, strike and hinge side (total 6 sets of shims each side). Adjust for uniform reveals. At all shim locations, nail at opposite side of doorstop. Recheck complete door operation and reveals
- I	 Recheck hinge side is still plumb, centered between wall surfaces Verify consistent door stop contact, adjust side jambs as needed With door still tight to hinge side jamb, secure with one 2½" collated nail at each hinge location on non-hinge side of doorstop and through shims. Re-check plumb (on hinges) and jamb centered in wall. Adjust as required. Replace one short screw in top hinge with #8 3" brass screw. Adjust for equal head jamb reveals. Recheck door operation and head jamb reveal. Adjust strike side jamb up/down as needed Verify uniform contact with door stop, latch & strike alignment, jambs centered within wall (max 1/8") past/shy of wall surface. Adjust as required. Check reveals at top and bottom of hinge jamb Adjust shims against the head jamb as required so top reveal equals reveal below top hinge. Secure with 2½" collated nails on one side of doorstop. Shim and nail bottom of hinge jamb until reveal equals reveal at top of bottom hinge. Check reveals at top and bottom of strike jamb (minimum 1/8"). Shim and nail at the bottom of jamb until equals top reveal. Install and nail (non-hinge) side of doorstop) remaining shims: strike side top & bottom hinge locations; above the latch location. Install shims in center of head jamb, adjust for consistent reveal across jamb, and nail on one side of doorstop. Re-verify contact between door and doorstop at head jamb and strike jamb. Tap 2x4 scrap or spacer on jamb (<1/8" from plaster) and/or doorstop to adjust. Last resort: remove/re-install doorstop. Install and nail additional shims between hinge locations, strike and hinge side (total 6 sets of shims each side). Adjust for uniform reveals. At all shim locations, nail at opposite side of doorstop.

Quality Points

Chapter 18 – Installing Swinging Doors

- Verify install for hard flooring or carpeted area
- Door opens and closes freely and latches snug to striker plate and against door stop
- Uniform reveal at top and sides between door and jamb
- Door trim fits tight to jamb (NO GAP) and is nailed properly (check visually and with "TAP TEST") and uniform consistent reveal on ALL jambs (sides and top)
- Tight fitting and GLUED miter joints
- · All nails set and puttied
- · Appropriate door stop installed
- Appropriate lock set installed (passage or privacy type)
